Sir:

In response to the Official Action of November 20, 1989,  
please amend the above-identified application as follows.

IN THE CLAIMS

Please amend claims 21 through 23 and 26 as follows.

CM | 21. (Three times amended) A tubular protective device for  
protection against a transfer of infectious matter during sexual  
intercourse consisting of:

D/ P (a) a flexible, thin-walled tube having a sufficiently  
large first diameter to permit movement of a penis  
within said tube during coitus, said tube having a  
closed end and an open end, said open end having;
